India: Naveen Patnaik, the chief minister of Odisha, has attended the inauguration of Ramco Cement's new cement grinding plant at Haridaspur. The unit had a cost of just under US\$100m and has created 105 direct jobs. A LM 46.2+2 CS type vertical roller mill with a capacity of 3750kW has ordered from Germany-based Loesche in 2018 for the project. The cement producer says that the plant is designed to be 'totally dust free,' including bag filters designed to ensure emission levels below 30mg/m³.
